MESSES. McNALLY & Co. have laid on our table Messus McNally & Co. have laid on our table a copy of a new Railroad Guide, entitled Lloyd's American Guide, which appears to be the most complete thing we have ever seen. It contains considerable pleasant reading matter, besides newly arranged time tables. The history of the locomotive illustrated with engravings. They, also, have Appleton's and Dummore's Guides, Peterson's, Ballon's Dollar Monthly, the Monthly Nevelette Adams' Chicz, or and Thompson's New York Detectors of the 10th of November, and all late papers, magazine. &c.

M he incendiarism.—Monday morning has about 5 o'clock it was discovered that the two story frame building, corner of Harrison and South Clark streets, was on fire, and on entering the room in which the fire was, a large pile of combustibles were on fire in the middle of the room. The flames were extinguished without a general slarm. Near the pile stood an oil or fluid can, which had probably been used by some person in lighting it. The room which is diglimin, and for a block was on fire had not been occupied for some time, as with of the said Park? but a family lived in the front part of the building who thus narrowly escaped. The lower part of the building was compled by the grocery establishment of Mr. E. G. Reynolds, who is the owner of the

course of lectures before the Young Men's Association commences. The first lecturer is the Rev. Dr. Tyng, of Philadelphia, one of the ablest divines in the country. We are not informed as to the subject upon which the Rev. gentleman will discourse. The Lecture Committee of the Association have spared no effort to make this course the most excellent ever given by the Association, and from the distinguished lecturers who are causaged we cannot but augur a successful season. We regret to learn that our citizens have not responded with their usual liberality to the appeals of the Committee but trust that ample amends will be made by the backward before to-morrow even g.

PAID FIRE DEPARTMENT.-Much complaint h been made the last year in regard to the Fire De-partment of Chicago, by Insurance Companies do-ing business in the city and by property holders.— The last menth's experience has certainly been one that must convince every person that if a change is not soon made, the Insurance Componies will be compelled to estimate their rates of insurance in Dr. Howard's lecture before Bryant & Stratton's Confessor, it is rentered by the part apparament, it is rentered by the opposition in the same apparament, it is rentered by the opposition in the same proportion as the vigilance of fire companying developes, it is rentered by the opposition in the same proportion as the vigilance of fire companying developes. Dr. Howard's lecture before Bryant & Stratton's Confessor, it is rentered by the same proportion as the vigilance of fire companying the same proportion as the vigilance of surance Companies to act in this matter, and we out sincerely hope they will do so with vigor, as a are fully convinced that they will receive the

> wiferings of the poor in our midst, this coming winter. Already the cold begins to set in, and the time for closing of the season's business is nigh at band, when hundreds of men, living from day to day on what they earn, will be thrown out of employment, and then inevitably must done the worst time we have ever seen in Chicago. Cannot the city authorities devise some means by which they can be employed? We certainly have enough to do driven to this means of getting a livelihood before. If there is not something done soon, we shall have plenty of stealing and robbing going on. Let us bear from you if you please. H.

The city banks, last night, resolved to call on the country banks to redeem daily at the Metropolitau Bank, after Monday, 15th. Nov. The present accumulation of country currency will be earried by the city banks until the first of May acrt; it, however, will be taxen up on last January, 1st February, 1st March, 1st April. and 1st May, at the rate per cent, to be allowed after 1st December.

The Bankers are understood to look to an early resumption, provided the arrangement is agreeable to country banks.

Both boards of the Common Council have acted on the Mayor's Message in reference to the unemployed poor. The Aidermen resolved not to adopt the suggestions relative to the issue of stock to procure large supplies of food. They, however, passed resolutions having for their object the employment of the poor. The Counsilmen also reported that they had not the power to provide relief in the direct manner pointed out by the Mayor. They, however, passed resolutions urging upon the different boards having charge of public works, to employ laborers, and also recommend the Governor of the Alms House to purchase and store provisions in anticipation of destitution among the laboring class.

John Gridley, of Kenosha, Wisconsin, and Rev. Mr. Searle, of Princeton, Ill., took part. The resolution was unanimously adopted.

The basiness Committee, through the Rev. Mr. Eddy, offered the following resolution:

Resolved, That the principle of unconditional legal prohibition should be the ultimate aim of temperance organizations and temperance men.

This resolution was discussed at great length by Mesys. Law and Gridley, of Wisconsin; D. D. Gillett and T. H. Jacokes, of Michigan; Parker Earle, Dr. Lord and B. S. Boot, of Illinois; Wm. M. Clark, Assistant Cashier and Paying Teller of the Grocer's Bank, has been discovered to be a defaulter to that institution in the sum of \$68,000. He absconded some ten days ago, leaving behind him the notes and checks of a personal friend to the amount of about \$50,000 and a letter to the officers of the Bank, in which he stated that had accommodated said friend, and was the "victim of misplaced confidence." The scommodated "faiend" proves to be financially worthless. Mr. Clark's operations have been in progress for the lest year and a half, but had been so adroitly concealed by false entries that they were not discovered until the stamination of the books, since the bank has gone into liquidation.

She was lying there, when an Irish laborer, who was rescuing property, and was making his way out, stumbled over her.

She clutched his leg as she could not speak. He picked her up, and as the flames had then spread over the door, carried her to the nearest window. He broke the sash with his fist and called for help. By that time the fire was scorching him, and to save the helpless woman, het held her at arms length out of the window. A ladder was fortunately at hand, and Mrs. Abboit was speedily saved.

When taken down she was entirely insensible, and was slightly barned about the face and arms. She was conveyed to a neighboring house, where she soon recovered. Her deliverer, whose name is Dominick, is badly burned about the face and neck, though he is by no means dangerously injured. His heroic conduct meets with universal commendation, and will, no doubt, be promptly rewarded. The child of Mrs. Abbott had been rescued by Mrs. Lurkin on the first alarm.

Letter from Rev. Thos. S. Williamson PORTED MASSACRE OF FIVE HUNDRED SOLDIES

From the St. Paul Tunes, Nov. 6.]

PAJOYARES, October M. 187.

A report reached this noighborhood on day before yestorday, that five hundred American soldiers have been cut off by a large party of Teetonwan, near the Missouri River. The news was brought here by a man from near the apper end of Big Stone Lake, whose son-in-law (one of the upper Sissitonwan) had just returned from a camp of the Ibanktonwan, on the Missouri River, where he heard the news. He reports that whilst he was there a number of Teetonwan came to the camp of the Ibanktonwan to dance the scalp dance, and that he saw them mounted on the dragoon horses, with the holsters and pistols which they had taken. They said that the Long Knives were going to war, and not very far from some Fort on the Missouri, and as they proceeded westward they camped near a large body of the Teetonwan, who, hearing their drums, in the night surrounded the camp, and while they were nearly all asleep rashed upon them and killed them with their knives and war-olubs before the Long Knives could get their guns or horses, and not one escaped.

There have been of late some remarkable incidents in the history of authors. We hinted at them last month. Dickens was invited to perform before the English Queen and court, and declined to appear unless be said his friends, being gentlemen, were treated as gentlemen—a natural courtesy which the Queen (being no gentleman) declined. Gold is more plenty and the buying rate has fallen—the selling rate remains at 5 per cent. premium. Current bills, buying, 2 per cent.

Exchange is also more plenty, but currency being scarce, very little is sold. The Grasshoffer Farms.—Now as this new dodge to raise the wind has completely fiatted out, will not our exchanges who have given publicity to the rumor, do us the favor to contradict it? It seems that in some portions of Stearns county the grasshoppers did destroy most of the crops, but in other portions the yield was abundant, and that no necessity existed for calling for aid outside of the county where the destruction was visible, nor for going outside of the Territory. The committee who did so was self-constituted, and considerably more coared than hurt. We have never known the crops of Minne

to yield so plentiful a harvest as during the past season. In the Minnesota vailey and in the southern portion of the Territory our farmers speak in the most enthusiastic terms of the crops, and had not the grasshoppers com-natted depredations in some of the northern counties, we should have been able to say, that never before had Minnesotians been better propared to supply themselves with the neces-saries of life than during the years 1857-8. As it is, those who have been unfortunate can easily be cared for by the resources within our own reach. So do us the justice, gentlemen of the press, to say, that we are not starving, but that we are in a smiling and prosperous condi-tion, aside from the general cramp caused by

SHAMEFUL NEGLECT.—The Superior Chronicle of the 13th is deservedly severe on the post office department, for its total neglect of the postal necessities of the people of that region. The principal mail route—especially during the winter months—is from St. Paul via this the winter months—is from St. Paul via this city and Taylor's Falls. Last spring the department ordered an increase in the service on this route to that of a tri-weekly, but neglected to increase the contractor's pay in the same ratio. The increased service was commenced, and the matter brought to the attention of the destroyer, but we to this time the department. the matter brought to the attention of the de-partment, but up to this time the department has not paid the slightest attention to the grievances. As a matter of necessity the con-tractor abandoned his contract, leaving that region destitute of mails, save occasional ones via the lake. We are informed that tons of mail matter now lie scattered along the route between Taylor's Falls and Superior, among which are valuable remittances. This is a shameful state of affairs.

Good Order in New York.—If any man has doubted that the Metropolitan Police Law was designed and is destined to introduce a better order of things in this city, yesterday must have done something to work conviction. An election of such sobriety, regularity, good order, and honest management has not taken place in this city for years. The law forbidding the sale of intoxicating liquors on election the sale of intoxicating liquors on elect day, and that prohibiting the erection of a booth or box, for the distribution of tick within in one hundred and fifty feet of politing place, were both faithfully enforced nost que citizen in the chiefs. C. Y. WILEY,

DAILY TRIBUNE There is now in course of construction, at the Southwark Iron Works, a small stemmship, built of iron upon a new principle, which the beilders believs will accomplish an average speed of from 25 to 30 miles an hour. The invention, for which a patent has been obtained, is intended to be applied to special mansit vessels only, and is not suitable to river stemmers' or other vessels intended to be used where the water is shallow or the channels uncertain. Should the expectations of the builders be realized, a vessel built and fitted in the manner proposed can make the voyage from Liverpool to New York in five days, or from Liverpool to New York in five days, or from Liverpool to Melbourne in forty days. The novelty of the invention consists for the most part in constructing the vessel so that the centre of gravity is placed below the water line. This is effected by constructing a chamber called a "well?" all along the bottom of the vessel in which the machinery; coals, and stores can be deposited. As it is not proposed that the vessel shall carry cargo, the centre of gravity will thus become a suspended instead of a supported body; and it is believed that this peculiar formation will materially decrease the area of resistance to the water. The sides of the vessel rise perpendicularly from the wall; and although the appearance of the vessel at present is anything but graceful, the patentae is of opinion that her form is constructed so as to secure the greatest amount of speed compatible with safety.

The improvements proposed to be carried out may be shortly described as follows: 1. Vessels built according to this plan show a decrease in the area of resistance to the water full 36 per cent, when measured against any other vessel of the same breadth of beam and draught of water, thus insuring greater speed. 2. They have a better disposition of the center of gravity, a consequent increase in stability, and a decrease in the amount of oscillation, enabling them, when required, to carry a larger quantity of canvas than CHICAGO TRIBUYE JOB PRINTING OFFICE. HAVING MADE LARGE ADDITIONS OF STREET, Types Freeze, tota and Stationery to the court Job Printing Establishment, RAY, MEDILL & CO. EDNESDAY MORNING...NOVEMBER 11 "LEAVE BUSINESS BEHIND YOU." portion of the invention is to prevent collisions at sea during dark nights or foggy weather. The novelty in the steam-propeller is confined to the manner of fixing the fans, so that each blade when revolving will clear the other of back-water. This adaptation seems extremely simple. The introduction of a buoyant drum or boss, in which the root of the fan is fixed, also reduces the weight of the shaft by about two-thirds. The trial vessel, which will be ready for launching in a few days, is of 60 tons two-thirds. The trial vessel, which will be ready for launching in a few days, is of 60 tons burthen, and when fitted with her engines and stores will weigh only 14 tons. She is formed of plate iron one-eighth of an lach thick, and ribs 15 inches apart. The inventor proposes to take her to New York when finished. There can be no doubt that light iron steamers, without cargo and driven by high-pressure engines, can attain very great speed in passing through the water but it would be premature to assert that the vessel now building will realize all the anticipations which the huilders have formed of her powers. If she does, she will be the precursor of great reforms in steam navigation. Watches, Jewelry, &c. R.
